All monies derived from civil penalties shall be deposited, pursuant to sections 35-146 and 35-147, in the state general fund.

Sec. 31. Section 49-1572, Arizona Revised Statutes, as transferred and renumbered, is amended to read:

49-1572. Standards for oxygenated fuel; volatility; exceptions

A. From and after September 30 through March 31 of each year, in a county with a population of one million two hundred thousand or more persons and in any portion of a county contained in area A, blends of gasoline with ethanol shall not exceed the volatility requirements prescribed by section 41-2083 49-1533 and rules adopted by the director under that section. From and after September 30, 1999 through March 31, 2000 and From and after September 30 through March 31 of each year thereafter, in area B, blends of gasoline with ethanol may exceed the volatility requirements prescribed by section 41-2083 49-1533 and rules adopted by the director under that section by up to one pound per square inch if the base fuel meets the requirements of ASTM D4814 and the final gasoline-ethanol blend contains at least six percent ethanol by volume but does not exceed United States environmental protection agency waivers. For any other locations and period of time, blends of gasoline with ethanol shall meet the volatility requirements as determined by department rule.

B. Notwithstanding subsection D of this section, the director of the department of weights and measures in consultation with the director of the department of environmental quality shall approve alternate fuel control measures that are submitted by manufacturers or suppliers of gasoline and that the directors determine will result in motor vehicle carbon monoxide emission reductions that will equal or exceed the reductions that result under subsection D of this section. In making those determinations, the directors shall compare the alternative measure against the emission reduction that would be obtained from a fuel with the maximum vapor pressure standard prescribed by subsection D of this section and the minimum oxygen standard prescribed by section 41-2123 49-1573 or 41-2125 49-1576. Alternative fuel control measures approved by the director of the department
of weights and measures in consultation with the director of the department of environmental quality may be used by any manufacturer or supplier of gasoline unless the approval is rescinded by the director of the department of weights and measures at least one hundred eighty days before the beginning of any oxygenate period in the future. Manufacturers and suppliers who choose to use an approved alternate fuel control measure shall annually submit a compliance plan to the director of the department of weights and measures not later than sixty days prior to the start of the oxygenate period.

C. From and after September 30 through March 31 of each year, all blends of gasoline with alcohol other than ethanol shall satisfy all of the requirements prescribed by section 41-2083 49-1533 and rules adopted by the director under that section and the provisions of a waiver issued by the United States environmental protection agency pursuant to 42 United States Code section 7545(f).

D. Notwithstanding subsection A of this section, if the director of the department of environmental quality has previously raised the minimum oxygen content to the maximum percentage of oxygen allowed for each oxygenate as provided by section 41-2125 49-1576, the designated air quality planning agency for area B has considered, analyzed and reviewed the costs and benefits of all other reasonable and available control measures in lieu of reducing volatility requirements to nine pounds per square inch and the director of the department of environmental quality finds that area B has failed to maintain the carbon monoxide national ambient air quality standards by violating the standard, beginning with the oxygenate period beginning on the following September 30 and for each oxygenate period thereafter in area B, the volatility requirements described by section 41-2083 49-1533, subsection G may be reduced to nine pounds per square inch. If a violation of the carbon monoxide national ambient air quality standards is recorded after the volatility requirements have been reduced to nine pounds per square inch, the director of the department of environmental quality shall remove the one pound per square inch waiver for gasoline-ethanol blends.

E. Beginning on January 1, 2005, Gasoline that is supplied or sold by any person and that is intended as a final product for the fueling of motor vehicles within this state shall not contain the following:

1. Methyl tertiary butyl ether that exceeds 0.3 percent by volume.
2. Beginning on January 1, 2006, a total of more than 0.10 percent oxygen by weight collectively from all of the following oxygenates:
   (a) Diisopropylether (DIPE).
   (b) Ethyl tert-butylether (ETBE).
   (c) Iso-butanol.
   (d) Isopropanol.

   (f) N-butanol.
   (g) N-propanol.
   (h) Sec-butanol.
   (i) Tert-amylmethylether (TAME).
   (j) Tert-butanol.
   (k) Tert-pentanol (tert-amylalcohol).

F. Subsection E of this section does not prohibit the transshipment through this state, including storage incident to that transshipment, of gasoline that contains the oxygenates prescribed by subsection E of this section if both of the following apply:
   1. The gasoline is used or disposed outside this state.
   2. The gasoline is segregated from gasoline that is intended for use inside this state.

Sec. 32. Section 49-1573, Arizona Revised Statutes, as transferred and renumbered, is amended to read:

49-1573. Area A; sale of gasoline; oxygen content

A. From and after November 1 through March 31 of each year:
   1. All gasoline that is supplied or sold by any person and that is intended as a final product for the fueling of motor vehicles within a county with a population of one million two hundred thousand or more persons and any portion of a county contained in area A or that is consumed in a motor vehicle in a county with a population of one million two hundred thousand or more persons and any portion of a county contained in area A by a fleet owner shall, for a gasoline-ethanol blend, contain not less than ten percent by volume of ethanol nor more than the maximum percentage of oxygen allowed by provisions of a waiver issued or other limits established by the United States environmental protection agency.

   2. All gasoline that is supplied or sold by any person and that is intended as a final product for the fueling of motor vehicles within a county with a population of one million two hundred thousand or more persons and any portion of a county contained in area A or that is consumed in a motor vehicle in a county with a population of one million two hundred thousand or more persons and any portion of a county contained in area A by a fleet owner shall, for a gasoline-ethanol blend, contain not less than ten percent by volume of ethanol nor more than the maximum percentage of oxygen allowed by provisions of a waiver issued or other limits established by the United States environmental protection agency.
vehicle within a county with a population of one million two hundred thousand

owner shall, for a blend other than a gasoline-ethanol blend, contain not
less than 2.7 percent by weight of oxygen nor more than the maximum
percentage of oxygen allowed by provisions of a waiver issued or other limits
established by the United States environmental protection agency.

B. Notwithstanding subsection A of this section, the director of the
department of weights and measures in consultation with the director of the
department of environmental quality shall approve alternate fuel control
measures that are submitted by manufacturers or suppliers of gasoline and
that the directors determine will result in motor vehicle
carbon monoxide emissions that are equal to or less than emissions that
result under compliance with subsection A of this section and section 41-2083
49-1533. In making this determination, the director of the department of
weights and measures and the director of the department of environmental
quality shall compare the emissions of the alternate fuel control measure
with the emissions of a fuel with a maximum vapor pressure standard as
prescribed by section 41-2083 49-1533 and with the minimum oxygen content or
percentage by volume of ethanol as prescribed by this section.

C. Any alternate fuel control measures that are approved shall not
increase emissions of non-methane hydrocarbons, particulates, carbon monoxide
or oxides of nitrogen. Alternate fuel control measures approved pursuant to
subsection B of this section and this subsection may be used by any
manufacturer or supplier of gasoline unless the approval is rescinded more
than one hundred eighty days before the first day of a gasoline control
period. Manufacturers and suppliers who use an approved alternate fuel
control measure shall annually submit a compliance plan to the director of
the department of weights and measures no later than sixty days before the
first day of a gasoline control period.

percentage of oxygen allowed by the provisions of a waiver issued by the United States environmental protection agency.

B. Notwithstanding subsection A of this section, at any time earlier than sixty days before September 30 of each year, the designated air quality planning agency for area B with the concurrence of the director of the department of environmental quality may give notice, pursuant to the applicable plan required under section 49-406 for the Tucson air planning area, to the director of the department of weights and measures that the minimum oxygen content for the ensuing oxygenate seasons will be increased not less than .3 PERCENT by weight of oxygen and not more than the maximum percentage of oxygen allowed for oxygenates by provisions of a waiver issued or other limits established by the United States environmental protection agency. Before making a determination to increase the minimum oxygen content pursuant to this subsection, the designated air quality planning agency for area B shall consider and conduct a cost-benefit analysis on all reasonable carbon monoxide emission reduction measures that could be implemented in lieu of increasing the minimum oxygen content.

Sec. 36. Section 49-1592, Arizona Revised Statutes, as transferred and renumbered, is amended to read:

49-1592. Stage I vapor recovery systems

A. A person shall not offer for sale, sell, install or use a new gasoline stage I vapor recovery system, or any new or rebuilt component parts of the system, unless the system or component part has been certified by the California air resources board as of March 31, 2001 or after that date, or has been approved by a third party accredited to test equipment and recognized by industry and the department, and has not been rejected by the department. The department shall maintain and keep current a list of stage I vapor recovery systems and component parts that are approved by the department. Only those systems that are approved shall be used in this state. All certified vapor recovery components must be clearly identified by a permanent identification affixed by the certified manufacturer or rebuilder.

B. For gasoline dispensing sites with a throughput of over ten thousand gallons per month in area A or area B as defined in section 49-541, a person shall not transfer or allow the transfer of gasoline into storage tanks at gasoline dispensing sites unless the storage tank is equipped with a stage I vapor recovery system consisting of a vapor-tight return line from the storage tank or its vent to the gasoline transport vehicle.
C. An owner or operator of a gasoline storage tank, gasoline transport vehicle or gasoline dispensing site subject to stage I vapor recovery requirements shall comply with the following:

1. Install all necessary stage I vapor recovery systems and make any modifications necessary to comply with the requirements.

2. Provide adequate training and written instructions to the operator of the affected gasoline dispensing site and the gasoline transport vehicle.

3. Replace, repair or modify any worn or ineffective component or design element to ensure the vapor-tight integrity and efficiency of the stage I vapor recovery systems.

4. Connect and ensure proper operation of the stage I vapor recovery systems whenever gasoline is being loaded, unloaded or dispensed.

5. In area A and other geographical areas as provided by subsection G of this section, have the stage I vapor recovery system tested annually by a registered service representative licensed by the department of TRANSPORTATION.

D. Before the initial installation or modification of any stage I vapor recovery system, the owner or operator of a gasoline storage tank, gasoline transport vehicle or gasoline dispensing site shall obtain a plan review and approval from the department. Application for the plan review and approval shall be on forms prescribed and provided by the department.

E. The department of weights and measures in consultation with the department of environmental quality and the state fire marshal shall establish by rule standards for the installation and operation of stage I vapor recovery systems. The department of weights and measures shall establish by rule plan review and approval fees. In establishing those rules and standards, the director shall consider requirements in other states to ensure that only state-of-the-art technology is used.

F. Approval of a stage I vapor recovery system by the department does not relieve the owner or operator of the responsibility to comply with other applicable statutes, codes and rules pertaining to fire prevention, environmental quality and safety matters.

G. Any county, city or town outside of area A or area B as defined in section 49-541 may require gasoline dispensing sites with a throughput greater than ten thousand gallons per month to install, operate and maintain stage I vapor recovery systems in accordance with this section. Any county, city or town, including cities and towns within area B, also may require annual testing of required stage I vapor recovery systems pursuant to
subsection C of this section. For a county, city or town considering the adoption of a resolution to require stage I vapor recovery systems or annual testing within its jurisdiction and on request, the department of environmental quality shall provide technical assistance in evaluating the air quality in that county, city or town and shall provide final review and approval of an adopted resolution.

H. A county board of supervisors or governing body of a city or town shall submit a resolution approved by the department of environmental quality to the director of the department of weights and measures requesting the imposition of the requirements for stage I vapor recovery systems within its jurisdiction.

I. The director shall adopt, by rule, compliance schedules for gasoline dispensing sites located within the jurisdiction requesting stage I vapor recovery system requirements no later than twelve months after receipt of the resolution from the county board of supervisors or governing board of a city or town. All gasoline dispensing sites shall be required to comply with stage I vapor recovery system rules within twenty-four months after the rules have been filed with the secretary of state. Sites with stage I vapor recovery systems already installed must comply with the testing requirements at the time the rules become effective.

J. A county board of supervisors or governing body of a city or town that adopts the requirements for stage I vapor recovery systems may repeal those requirements by adopting a resolution to remove the imposition of those requirements within its jurisdiction unless the county, city or town is in an ozone nonattainment area that has since been designated as moderate, serious or severe by the United States environmental protection agency under section 107(d) of the clean air act. On receipt of the resolution, the director of the department of weights and measures shall consult with the director of the department of environmental quality to verify that a county, city or town is outside of an ozone nonattainment area designated as moderate, serious or severe by the United States environmental protection agency under section 107(d) of the clean air act. After consultation with the department of environmental quality, the director of the department of weights and measures shall revise the rules to repeal the requirements for stage I vapor recovery systems within that jurisdiction as soon as practicable.
Sec. 37. Section 49-1593, Arizona Revised Statutes, as transferred and renumbered, is amended to read:

49-1593. Compliance schedules

Notwithstanding section 41-2132 49-1592, subsection I relating to schedules of compliance:

2. All gasoline dispensing sites located in area A or in any other geographical area as provided in section 41-2132 49-1592, subsection G that begin underground storage tank replacement and that apply for a permit pursuant to title 49, chapter 3, article 3 or 5 OF THIS TITLE on or after September 30, 1992 shall be in compliance within six months after the effective date of the rules adopted pursuant to section 41-2132 49-1592. Compliance with this article is a condition of the permit.

The department shall prescribe forms for the application for the plan review and approval.

E. The operator of each gasoline dispensing site using a stage II vapor recovery system shall conspicuously post operating instructions for the system in the gasoline or oxygenated fuel dispensing area. The instructions shall clearly describe how to fuel vehicles correctly with the vapor recovery nozzles used at the station and shall include a warning that topping off may

The department of weights and measures in consultation with the department of environmental quality and the state fire marshal shall establish by rule standards for the installation and operation of stage II vapor recovery systems. The department of weights and measures shall establish by rule plan review and approval fees. In establishing those rules and standards, the director shall consider requirements in other states to ensure that only state-of-the-art technology is used.

K. The requirements for stage II vapor recovery systems prescribed in subsections A through E of this section do not apply to an owner or operator who has decommissioned stage II vapor recovery equipment in accordance with
the standards established by the department pursuant to subsection H of this section.
