- Arizona OpenTable Saturday Reservations	July 4*	---	---	---	(16.2)%	(70.5)%

^{1/} Data reported weekly

^{2/} Reported Unemployment Insurance Initial Claims and Continued Claims do not include claims associated with the federally funded Pandemic Unemployment Assistance (PUA) program. In addition to these amounts, last week the PUA program had 156,0443 applications for initial claims and 1,983,603 applications for weeks of continued claims. DES did not publish updated data this week. The Continued Claims figure for the base UI program and the PUA program are duplicated counts that reflect multiple weeks' claims for insurance and should not be used as the basis for the total number of people currently receiving UI benefits in either program.

^{3/} The Prior Period and Change from Prior Period columns for these categories reflect the change from 4 weeks prior, rather than the most recent time period.

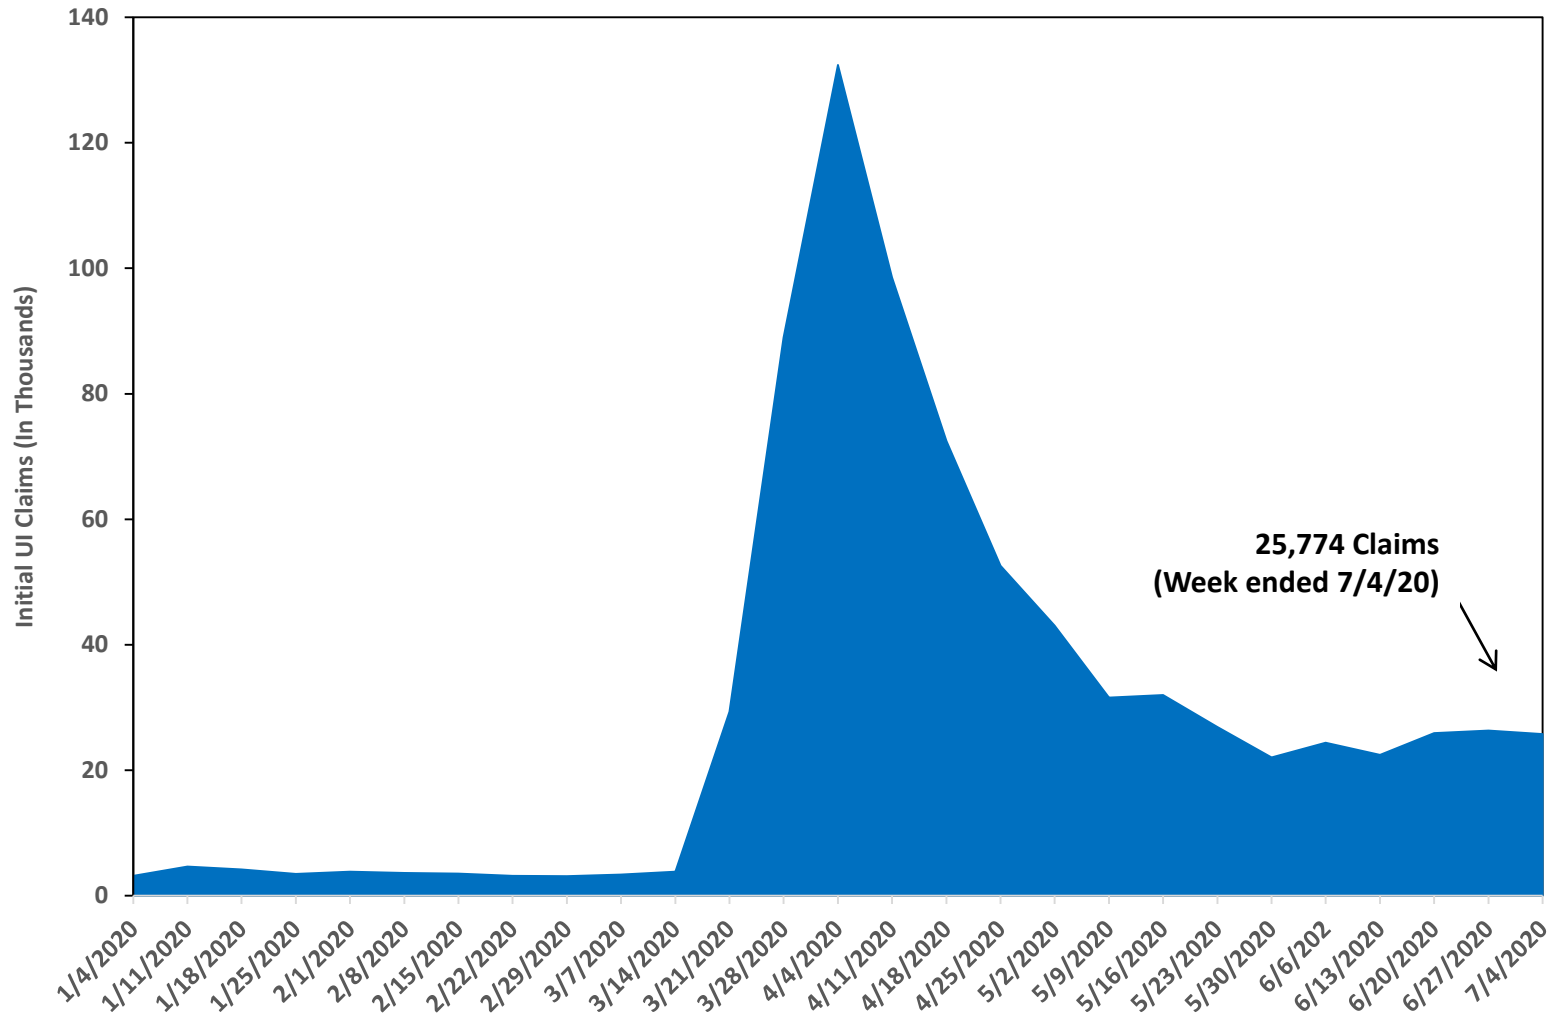

^{4/} Data from the U.S. Census Household Pulse survey. This survey estimates the total amount of the population over 18 years old who did not work in the last 7 days. This measure includes people who are retired and who are not participating in the labor force. Therefore, this reported measure is not the same as unemployment.
