Sec. 25. Section 3-3491, Arizona Revised Statutes, as renumbered, is amended to read:

3-3491. Standards for oxygenated fuel; volatility; exceptions
A. From and after September 30 through March 31 of each year, in a county with a population of one million two hundred thousand or more persons and in any portion of a county contained in area A, blends of gasoline with ethanol shall not exceed the volatility requirements prescribed by section 3-3433 and rules adopted by the associate director under that section. From and after September 30 through March 31 of each year, in area B, blends of gasoline with ethanol may exceed the volatility requirements prescribed by section 3-3433 and rules adopted by the associate director under that section by up to one pound per square inch if the base fuel meets the requirements of ASTM D4814 and the final gasoline-ethanol blend contains at least six percent ethanol by volume but does not exceed United States environmental protection agency waivers. For any other locations and period of time, blends of gasoline with ethanol shall meet the volatility requirements as determined by division rule.

B. Notwithstanding subsection D of this section, the associate director of the division in consultation with the director of the department of environmental quality shall approve alternate fuel control measures that are submitted by manufacturers or suppliers of gasoline PROVIDERS and that the directors DIRECTOR AND THE ASSOCIATE DIRECTOR determine will result in motor vehicle carbon monoxide emission reductions that will equal or exceed the reductions that result under subsection D of this section. In making
those determinations, the director of the Department of Environmental Quality and the associate director shall compare the alternative measure against the emission reduction that would be obtained from a fuel with the maximum vapor pressure standard prescribed by subsection D of this section and the minimum oxygen standard prescribed by section 3-3493 or 3-3496.

Alternative fuel control measures approved by the associate director of the division in consultation with the director of the department of environmental quality may be used by any manufacturer or supplier of gasoline unless the approval is rescinded by the associate director of the division at least one hundred eighty days before the beginning of any oxygenate period in the future. Manufacturers and suppliers who choose to use an approved alternate fuel control measure shall annually submit a compliance plan to the associate director not later than sixty days prior to the start of the oxygenate period.

C. From and after September 30 through March 31 of each year, all blends of gasoline with alcohol other than ethanol shall satisfy all of the requirements prescribed by section 3-3433 and rules adopted by the associate director under that section and the provisions of a waiver issued by the United States environmental protection agency pursuant to 42 United States Code section 7545(f).

D. Notwithstanding subsection A of this section, if the director of the department of environmental quality has previously raised the minimum oxygen content to the maximum percentage of oxygen allowed for each oxygenate as provided by section 3-3496, the designated air quality planning agency for area B has considered, analyzed and reviewed the costs and benefits of all other reasonable and available control measures in lieu of reducing volatility requirements to nine pounds per square inch and the director of the department of environmental quality finds that area B has failed to maintain the carbon monoxide national ambient air quality standards by violating the standard, beginning with the oxygenate period beginning on the following September 30 and for each oxygenate period thereafter in area B, the volatility requirements described by section 3-3433, subsection G may be reduced to nine pounds per square inch. If a violation of the carbon monoxide national ambient air quality standards is recorded after the volatility requirements have been reduced to nine pounds per square inch, the director of the department of environmental quality shall remove the one pound per square inch waiver for gasoline-ethanol blends.

E. Gasoline that is supplied or sold by any person and that is intended as a final product for the fueling of motor vehicles within this state shall not contain the following:

1. Methyl tertiary butyl ether that exceeds 0.3 percent by volume.
2. A total of more than 0.10 percent oxygen by weight collectively from all of the following oxygenates:
   (a) Diisopropylether (DIPE).
   (b) Ethyl tert-butylether (ETBE).
(c) Iso-butanol.
(d) Isopropanol.
(e) Methanol.
(f) N-butanol.
(g) N-propanol.
(h) Sec-butanol.
(i) Tert-amylmethylether (TAME).
(j) Tert-butanol.
(k) Tert-pentanol (tert-amylalcohol).

F. Subsection E of this section does not prohibit the transshipment through this state, including storage incident to that transshipment, of gasoline that contains the oxygenates prescribed by subsection E of this section if both of the following apply:

1. The gasoline is used or disposed outside this state.
2. The gasoline is segregated from gasoline that is intended for use inside this state.

Sec. 26. Section 3-3492, Arizona Revised Statutes, as renumbered, is amended to read:

3-3492. Area A; sale of gasoline; oxygen content
A. From and after November 1 through March 31 of each year:
1. All gasoline that is supplied or sold by any person and that is intended as a final product for the fueling of motor vehicles within a county with a population of one million two hundred thousand or more persons and any portion of a county contained in area A or that is consumed in a motor vehicle in a county with a population of one million two hundred thousand or more persons and any portion of a county contained in area A by a fleet owner shall, for a gasoline-ethanol blend, contain not less than ten percent by volume of ethanol nor more than the maximum percentage of oxygen allowed by provisions of a waiver issued or other limits established by the United States environmental protection agency.
2. All gasoline that is supplied or sold by any person and that is intended as a final product for the fueling of motor vehicles within a county with a population of one million two hundred thousand or more persons and any portion of a county contained in area A or that is consumed in a motor vehicle within a county with a population of one million two hundred thousand or more persons and any portion of a county contained in area A by a fleet owner shall, for a blend other than a gasoline-ethanol blend, contain not less than 2.7 percent by weight of oxygen nor more than the maximum percentage of oxygen allowed by provisions of a waiver issued or other limits established by the United States environmental protection agency.

B. Notwithstanding subsection A of this section, the associate director of the division in consultation with the director of the department of environmental quality shall approve alternate fuel control measures that are submitted by manufacturers or suppliers of gasoline PROVIDERS and that the director and the associate director determine will result in motor
vehicle carbon monoxide emissions that are equal to or less than emissions
that result under compliance with subsection A of this section and section
3-3433. In making this determination, the associate director of the division
and the director of the department of environmental quality shall compare the
emissions of the alternate fuel control measure with the emissions of a fuel
with a maximum vapor pressure standard as prescribed by section 3-3433 and
with the minimum oxygen content or percentage by volume of ethanol as
prescribed by this section.

C. Any alternate fuel control measures that are approved shall not
increase emissions of non-methane hydrocarbons, particulates, carbon monoxide
or oxides of nitrogen. Alternate fuel control measures approved pursuant to
subsection B of this section and this subsection may be used by any
manufacturer or supplier of gasoline PROVIDER unless the approval is
rescinded more than one hundred eighty days before the first day of a
gasoline control period. Manufacturers and suppliers who GASOLINE PROVIDERS
THAT use an approved alternate fuel control measure shall annually submit a
compliance plan to the associate director no later than sixty days before the
first day of a gasoline control period.

3-3512. Stage I vapor recovery systems

A. A person shall not offer for sale, sell, install or use a new gasoline stage I vapor recovery system, or any new or rebuilt component parts of the system, unless the system or component part has been certified by the California air resources board as of March 31, 2001 or after that date, or has been approved by a third party accredited to test equipment and recognized by industry and the department DIVISION, and has not been rejected.
by the division. The division shall maintain and keep current a list of
stage I vapor recovery systems and component parts that are approved by the
division. Only those systems that are approved shall be used in this state.
All certified vapor recovery components must be clearly identified by a
permanent identification affixed by the certified manufacturer or rebuilder.

B. For gasoline dispensing sites with a throughput of over ten
thousand gallons per month in area A or area B as defined in section 49-541,
a person shall not transfer or allow the transfer of gasoline into storage
tanks at gasoline dispensing sites unless the storage tank is equipped with a
stage I vapor recovery system consisting of a vapor-tight return line from
the storage tank or its vent to the gasoline transport vehicle.

C. An owner or operator of a gasoline storage tank, gasoline transport
vehicle or gasoline dispensing site subject to stage I vapor recovery
requirements shall comply with the following:
1. Install all necessary stage I vapor recovery systems and make any
modifications necessary to comply with the requirements.
2. Provide adequate training and written instructions to the operator
of the affected gasoline dispensing site and the gasoline transport vehicle.
3. Replace, repair or modify any worn or ineffective component or
design element to ensure the vapor-tight integrity and efficiency of the
stage I vapor recovery systems.
4. Connect and ensure proper operation of the stage I vapor recovery
systems whenever gasoline is being loaded, unloaded or dispensed.
5. In area A and other geographical areas as provided by subsection G
of this section, have the stage I vapor recovery system tested annually by a
registered service representative licensed by the division.

D. Before the initial installation or modification of any stage I
vapor recovery system, the owner or operator of a gasoline storage tank,
gasoline transport vehicle or gasoline dispensing site shall obtain a plan
review and approval from the division. Application for the plan review and

E. The division in consultation with the department of environmental
quality and the state fire marshal shall establish by rule standards for the
installation and operation of stage I vapor recovery systems. The division
shall establish by rule plan review and approval fees. In establishing those
rules and standards, the associate director shall consider requirements in
other states to ensure that only state-of-the-art technology is used.

F. Approval of a stage I vapor recovery system by the division does
not relieve the owner or operator of the responsibility to comply with other
applicable statutes, codes and rules pertaining to fire prevention,
environmental quality and safety matters.

G. Any county, city or town outside of area A or area B as defined in
section 49-541 may require gasoline dispensing sites with a throughput

stage I vapor recovery systems in accordance with this section. Any county,
city or town, including cities and towns within area B, also may require
annual testing of required stage I vapor recovery systems pursuant to
subsection C of this section. For a county, city or town considering the
adoption of a resolution to require stage I vapor recovery systems or annual
testing within its jurisdiction and on request, the department of
environmental quality shall provide technical assistance in evaluating the
air quality in that county, city or town and shall provide final review and
approval of an adopted resolution.

for gasoline dispensing sites located within the jurisdiction requesting
stage I vapor recovery system requirements no later than twelve months after
receipt of the resolution from the county board of supervisors or governing
board of a city or town. All gasoline dispensing sites shall be required to
comply with stage I vapor recovery system rules within twenty-four months
after the rules have been filed with the secretary of state. Sites with
stage I vapor recovery systems already installed must comply with the testing
requirements at the time the rules become effective.

J. A county board of supervisors or governing body of a city or town
that adopts the requirements for stage I vapor recovery systems may repeal
those requirements by adopting a resolution to remove the imposition of those
requirements within its jurisdiction unless the county, city or town is in an
ozone nonattainment area that has since been designated as moderate, serious
or severe by the United States environmental protection agency under section
107(d) of the clean air act. On receipt of the resolution, the associate
director of the division shall consult with the director of the department of
environmental quality to verify that a county, city or town is outside of an
ozone nonattainment area designated as moderate, serious or severe by the
United States environmental protection agency under section 107(d) of the
clean air act. After consultation with the department of environmental
quality, the associate director of the division shall revise the rules to
repeal the requirements for stage I vapor recovery systems within that
jurisdiction as soon as practicable.

   recovery program. The enforcement shall be enhanced through programs that
   may include increased frequency of or targeting of inspections, increased
   sampling frequency, use of portable analyzers or any other technique.
2. Establish standards and fees for required inspections of vapor
   recovery systems.
