

ARIZONA HOUSE OF REPRESENTATIVES

HB2039: federal form voter registrations; reporting

PRIME SPONSOR: Representative Townsend, LD 16

BILL STATUS: [House Engrossed](#)

Overview

Outlines the recording procedure for federal only voters.

History

In current statute, once the voter registration form is completed, signed and received by the county recorder it becomes an official public record of the registration of the elector ([A.R.S § 16-161](#)). An elector is not required to submit proof of citizenship, but if proof is not provided during registration, the elector may only vote in federal elections (www.azsos.gov). Upon completion of voter registration forms, the forms are filed alphabetically and stored in the general county register. After each general election the county recorder is required to provide an updated record of registration in the county general register to the Arizona state library, archives and public records. Images of original registration forms must be stored electronically in the voter registration database ([A.R.S § 16-163](#)).

Provisions

1. Requires, on statutorily prescribed dates, the county recorder to report to the Secretary of State (SOS) and post on the recorder's website the number of people who are registered to vote using the state and federal voter registration form and who have not provided proof of citizenship to the recorder. (Sec. 1)
2. Specifies that after each general election, the recorder must post on the recorder's website the number of ballots cast by those eligible to vote for federal offices only. (Sec. 1)
3. Makes a conforming change. (Sec. 1)
